This document is designed to help you explain the key features and new improvements in Sage 50 Accounts 2011.

Sage 50 Accounts 2011

Accounting software for small to medium-sized businesses with tools that help you manage everything from cash flow and VAT returns (including online) to year-end accounts and customers and suppliers.

Key features

- **Cash flow**
See how much you're making, what's due, what payments you need to make and what's already been banked
- **VAT returns**
Fully accredited by HM Revenue & Customs so you can prepare and submit VAT returns online
- **Customers and suppliers**
Match your customer and supplier info to quotes, invoices and communications, including details of deposits, discounts and credit
- **SagePay**
Work with SagePay to transfer card payment details to your accounts instantly and promote speedy payments
- **Reports**
From an instant overview to the detailed facts and figures that help you understand your business

What's new?

Flat rate VAT

Set up and manage businesses on both invoice and cash-based flat-rate VAT schemes. Calculate the savings or losses to your business of flat-rate compared to standard VAT.

Charities

Manage your reporting by fund, produce Profit and Loss and Balance sheets without the need to export data.

Web store integration

Integrate your web store with your accounts. Using Sage Pay you can create new customers and products, sales invoices and receipts. Payments are downloaded automatically from your web store, saving you time.

Bank reconciliation

All the details you need are now on one printable screen. Complete customer and supplier receipts and refund without leaving the bank reconciliation to save you time.

Sage services

Find out exactly which Sage Services you can access with the new Services Toolbar in Sage 50 Accounts 2011. Update your Sage account details and access Sage software downloads.

Sage 50 Accounts Plus 2011
